

I believe the laws in New Jersey, with regard to telemarketing, are great. It should be my decision whether or not I receive unsolicited phone calls. If I have chosen not to receive them I certainly do not want the FCC to change that decision.

Recently the FCC has been fining broadcasting stations for what they consider more risque ads or shows, when all you have to do is change a channel to eliminate this problem. Yet they want to allow telemarketers to access our phone when there is NO WAY TO CHANGE THE CHANNEL other than turn off our phones.
